General Information

dormakaba

Programme holder

IBU – Institut Bauen und Umwelt e.V.
 Hegelplatz 1
 10117 Berlin
 Germany

Declaration number

EPD-DOR-20240264-CBA1-EN

This declaration is based on the product category rules:

Building Hardware products, 01.08.2021
 (PCR checked and approved by the SVR)

Issue date

29.11.2024

Valid to

28.11.2029

Dipl.-Ing. Hans Peters
 (Chairman of Institut Bauen und Umwelt e.V.)

Florian Pronold
 (Managing Director Institut Bauen und Umwelt e.V.)

Door closer TS Kompakt

Owner of the declaration

dormakaba International Holding GmbH
 DORMA Platz 1
 58256 Ennepetal
 Germany

Declared product / declared unit

1 piece of the product: Door closer TS Kompakt consisting of the following items:

- 1 door closer
- Product packaging

Scope:

This Environmental Product Declaration refers to a specific door closer manufactured by dormakaba. The production site is located in Suzhou (China).

The data represents the year 2022.

The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as *EN 15804*.

Verification

The standard EN 15804 serves as the core PCR	
Independent verification of the declaration and data according to ISO 14025:2011	
<input type="checkbox"/>	internally
<input checked="" type="checkbox"/>	externally

Matthias Klingler,
 (Independent verifier)

Product

Product description/Product definition

With the door closer TS Kompakt, dormakaba has developed a door closer which can be universally used on all common door types. It is particularly quick and easy to install – and does not require a mounting backplate. Changes in templating allow easy selection of the closing force to suit various door sizes.

For the use and application of the product the respective national provisions at the place of use apply. For the door closer TS Kompakt the standards which can be applied are the following:

- EN 1634-1
- UL 10c

...

Application

The door closer TS Kompakt is the ideal solution for standard doors.

Technical Data

The door closer TS Kompakt has following technical properties:

Name	Value	Unit
Closing force	2/3/4	adjustable
For standard doors	1100	mm
Non-handed	NA	standard
Hold-open function	NA	optional
Closing speed	NA	adjustable
Closing speed range	180-15/15-0	degrees

Performance data of the product with respect to its characteristics in accordance with the relevant

technical provision which can be applied are mentioned above.

Base materials/Ancillary materials

The major material composition including the packaging of the product is listed below:

Name	Value	Unit
Steel	61	%
Aluminium	25	%
Lubricant	7	%
Packaging	5	%
Plastics	<1	%
Paper	<1	%

The product includes partial articles which contain substances listed in the *Candidate List of REACH Regulation 1907/2006/EC* (date: 14.06.2023) exceeding 0.1 percentage by mass: yes

- Lead (Pb): 7439-92-1 (CAS-No.) is included in some of the alloys used. The concentration of lead in each individual alloy does not exceed 4% (by mass).

The *Candidate List* can be found on the *ECHA* website address: <https://echa.europa.eu/de/home>.

Reference service life

The reference service life of the door closer TS Kompakt amounts to 10 years, depending on the application and frequency of use. For repairs and renewals, suitable spare parts are available. The door closer is tested and certified to *UL10c*, meaning they are designed to withstand a minimum of 100,000 cycles.

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: Door closer TS Kompakt including packaging

Name	Value	Unit
Declared unit	1	piece/product
Mass of declared product without packaging	1.23	kg
Mass of packaging	0,07	kg

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4+ A5)

Production - Module A1-A3

The product stage includes: — A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes), — A2, transport to the manufacturer, — A3, manufacturing and assembly including provision of all materials, products and energy, as well as waste processing up to the end-of-waste state.

Construction stage - Modules A4-A5

The construction process stage includes:

— A4, transport to the building site; — A5, installation into the building; including provision of all materials, products and energy, as well as waste processing up to the end-of-waste state or disposal of final residues during the construction process stage.

End-of-life stage– Modules C1-C4 and D

The end-of-life stage includes: — C1, de-construction, demolition; — C2, transport to waste processing; — C3, waste processing for reuse, recovery and/or recycling; — C4, disposal; including provision and all transport, provision of all materials, products and related energy and water use. Module D (Benefits and loads beyond the system boundary) includes: — D, recycling potentials, expressed as net impacts and benefits.

Geographic Representativeness

Land or region, in which the declared product system is manufactured, used or handled at the end of the product's lifespan: Global

Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account. Background database: GaBi, SP40.

LCA: Scenarios and additional technical information

Characteristic product properties of biogenic carbon

Name	Value	Unit
Biogenic carbon content in product	-	kg C
Biogenic carbon content in accompanying packaging	0.03	kg C

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO₂.

Suzhou (China) is considered for A3.

Transport to the building site (A4)

Name	Value	Unit
Litres of fuel	0.00276	l/100km
Capacity utilisation (including empty runs)	55	%
Transport distance (ship)	10000	km
Transport distance via truck (from harbor to dormakaba logistic centre)	500	km
Transport distance via truck (for scaling)	100	km

The product is transported via truck and ship. The main distribution regions are Asia and the EU (Russia). For Asia and Russia, the product is stored in China with the calculated transport distances. For the rest of Europe, the product is stored in the dormakaba logistic center in Germany. In order to allow scaling to a specific point of installation 100 km is declared as well.

Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper and plastic)	0.07	kg

Reference service life

Name	Value	Unit
Life Span according to the manufacturer	10	a

End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.

C2: Transport to waste management is 50 km.

Name	Value	Unit
Collected separately waste type	1.23	kg
Recycling	1.23	kg
Energy recovery	0.0017	kg

The product is disassembled in a recycling process. Material recycling is then assumed for metals. The plastic components are assumed to be incinerated with energy recovery. Region for the End of Life is: Global.

Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit
Recycling	100	%

The collection rate is 100 %.

SQP	SQP	2.31E+01	3.35E-03	8.21E-03	0	1.87E-04	2.99E-02	0	-1.12E+00

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator “Potential Human exposure efficiency relative to U235”. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators “abiotic depletion potential for non-fossil resources”, “abiotic depletion potential for fossil resources”, “water (user) deprivation potential, deprivation-weighted water consumption”, “potential comparative toxic unit for ecosystems”, “potential comparative toxic unit for humans – cancerogenic”, “Potential comparative toxic unit for humans - not cancerogenic”, “potential soil quality index”. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.

This EPD was created using a software tool.
