welcome

# protection & comfort

## Bring comfort home

A good management of the sunlight enables to control the flow of light entering into your room and allows optimal temperature for your welfare.

Being able to control the flow of light provides:

- Appropriate lighting
- Energy savings
- Privacy
- Visibility through the exterior
- Control of the reflected light
- Optimisation of the outward visibility
- Better ventilation of the room

# style&decoration

## Decide what you want to see

The right blind combined with the ideal fabric and its components provide an atmosphere in accordance with the latest decorative trends.

Bandalux offers different types of fabrics for every decorative styles. It also presents a wide range of technical solutions.

From small windows to large openings. Supports adapted for two blinds, two transparencies (day&night)

- Diversity of dimensions
- Technical and decorative solutions
- Wide range of guides
- Accuracy and functionality
- High quality finishes
- Perfect positioning of the fabric
- Possibility to combine fabrics
- Wide colour range

Systems: Class · Fit · Premium · Premium Plus  
Atos · o-box · d-box · s-box

Possibility of covering windows with irregular shapes and offer specific solutions for moist environments

## pleated *blinds*

An array of solutions

New collections and trends for the most adaptable textile blind thanks to its low stacking height and various options of installation (arch, triangular, inclined or special trim). Can be operated by cord, chain, handle or motor.

System: *Imagine*

Option for sloped ceiling and curved spaces. Wide colour range

## vertical *blinds*

Everything in the movement

Two movements to accurately control the entry of the sunlight. Fits large windows, curved and sloped spaces, stairs configuration, etc. Can be operated by chain-cord, crank or motor.

System: Deco

 Bandalux

Plain colours or patterns that decorate your home

## roman blinds and pacchetto

A decorative textile proposal

Two systems of blinds with (or without) rods for the most decorative Bandalux blind. A wide range of textures and colours for contemporary environments. Can be operated by cord, chain or motor.

Systems: Toxa · Rodas · Skorpio

Elegance and comfort in any room. Also used to separate two spaces

## japanese panels

Motion with finesse

Japanese panels enable to separate two rooms or cover large openings. The wide range of fabrics and colours offer the possibility of combining the panels with different textures, patterns and tonalities. Can be operated by cord, wand, motor or manually.

System: Zen

●●●● Bandalux

Perfect management of the entry of sunlight. Great selection of combinations with the slat colour

## wood venetian *blinds*

Naturally warm

The nobility of wood becomes elegance when associated with venetian blinds. The subtlety of its lines transform the light into warmth, with a perfect natural finishing. Can be operated by cord, chain, crank or motor.

Systems: Nordic · Genuine

Different types of uniform and contemporary aesthetic. Optional monocommand operation

## aluminium venetian *blinds*

Lines of light

Clear lines and a wide range of colours and finishes complete this functional blind, ideal to direct the sunlight and maintain privacy. Can be operated by cord-wand, cord, chain, crank or motor.

Systems: Signum · Omega

Cosy environments exuding elegance with the possibility of combining fabrics and textures

## draperies

A versatile elegance

Combined with other Bandalux blind systems or used by itself, the traditional curtain is a modern and aesthetic solar protection system thanks to its wide range of technical and decorative fabrics. Can be operated by cord, motor or manually.

A great selection of bars, end caps and type of making

For all kinds of skylight blinds. Day/night option. Fabrics providing total darkness

Systems: Nova · Imagine

●●●●  Bandalux

Special lacquered colours under ordering.

Perfect integration into the facade. Easy installation with no need to carry out heavy work

## roller blinds with box

Effective and decorative

Designed to be installed outside or inside of any building, the roller blind with box offers aestheticism, robustness and a high level of finishing. This highly efficient solar protection system can be operated by chain, crank or motor.

Systems: o-box · d-box · s-box

Solar protection to make the most of outdoor spaces. Wide range of available models

# awnings

## Outdoor elegance

Interior comfort and exterior beauty are the major characteristics defining the wide range of Bandalux awnings. Can be operated by crank or motor.

Systems: Monobloc · Classic · Box · Balcony  
Projection · Veranda

Great variety of options for different architectural styles and wide colour range bringing elegance to any outdoor space

## outdoor solutions

Highly resistant to harsh climatic conditions

The Bandalux components used for outdoor applications are specially treated to withstand bad weather. They also offer strength and resistance to oxidation. Can be operated by crank and motor.

Optional guidance to avoid movements caused by the wind and intermediate profiles that guarantee a better hold of the fabric

## Lateral guiding options

The roller blind offers two guide options: steel cable covered with plastic and aluminium guides. They ensure a better fixation of the fabric and are essentials for outdoor installations. Can be operated by crank and motor.
