

Ensemble Rheinmetallgelände – Lighthouse, doubleU, Casa Altra

This modern city district accommodates residential buildings and offices, located on the historical industrial site of the company Rheinmetall AG in Düsseldorf Derendorf. The development is based on an urban and open-plan spatial concept with a central green promenade. The grounds of the building ensemble Lighthouse, doubleU, and Casa Altra separate the western entrance from the neighboring Ulmenstraße along the central green promenade. Furthermore, the grounds of the architectonic independent buildings create an interesting spatial sequence in a north-south direction. Open space between the buildings and impressive courtyards create an interesting series of attractive places in which to spend time and relax. Public, semi-public and private spaces are all united by their style, choice of plants, and materiality, thus creating a connection between the spaces and ensuring a high standard of quality throughout the entire quarter.
