Light elegance

The AVELLINO washbowl defines elegance in a new way. A slender silhouette gives it a delicate, almost floating lightness. This modern design principle goes beyond the mere exterior and not only creates a harmonious atmosphere in the room, but also ensures optimum comfort and hygiene thanks to the closed glass surface. Made from sustainable steel enamel, AVELLINO not only meets the highest demands in terms of aesthetics, but also focuses on longevity and circularity. This washbowl is an eye-catcher for both private bathrooms and excellent hotel bathrooms, where design, quality and functionality go hand in hand. AVELLINO is available in three sizes. Immerse yourself in the world of elegant bathrooms. AVELLINO - for modern design and timeless beauty in every bathroom.

The washbowls from KALDEWEI are filigree, almost delicate-walled. The fact that you cannot see the robust KALDEWEI steel enamel material is part of their appeal. But what is particularly fascinating is the puristic design of the washbowls, which enriches almost every KALDEWEI product series.

MING

Designed by KALDEWEI

NEW

WARM GREY 10
ENAMELLED COVER

The exquisite MING washbowl from KALDEWEI impresses with its fine design and generous interior depth. The exclusive series with its traditional silhouette inspired by Asian Ming vases is particularly characterized by its narrow edge line.

The entire series is made of sustainable and durable steel enamel.

All MING bowls have an easy-clean coating as standard, for particularly easy cleaning and a long-lasting shine.

CAYONO

Designed by KALDEWEI

ALPINE WHITE

The CAYONO washbasin combines puristic aesthetics with intelligent functionality: Developed for the designing of modern bathrooms, the washbasin impresses with its clear lines, which are rounded off by softly curved contours. Combined with the generous interior depth of the washbasin, the result is comfortable spaciousness that is an experience for every user. Thanks to its uniquely natural design, CAYONO can be used in a wide variety of projects.

NEW

COOL GREY 30

LINE EXTENSION Ø320

The NUEVA captivates with its clear, elementary form as the anti-thesis to an increasingly complex world. The concise offset in the contour of the new design gives the bowl a calm precision that predestines it to become the classic of tomorrow. The unique design of the bowl is accentuated especially in the interplay with the cubic characteristics of the room architecture. Made from sustainable steel enamel and designed to meet high demands, the NUEVA is suitable for luxury hotel bathrooms and wellness areas as well as for exclusive private bathrooms and public areas.
