FARBKARTE
COLOUR CHART

VERWENDUNG DER FARBKARTE

USAGE OF THE COLOUR CHART

ANMERKUNGEN :

Abweichungen von Farbe, Glanz und Oberflächenstruktur sind möglich. Die Angaben von Farbtönen der Farbstandards, z. B. nach RAL oder NCS sind Circa-Angaben. Je nach Bindemittel und Glanzgrad der Oberfläche ergeben sich Abweichungen vom Referenzfarbton. Eine Farbtongleichheit gegenüber Farbkarten und Farbfächern kann daher an Mustern und am Objekt nicht gewährleistet werden. Bitte beachten Sie, dass die Farben der Bildschirmanzeige bzw. des Druckes von den Originalfarben abweichen können. Zur Farbbestimmung nutzen Sie bitte einen original RAL-/NCS-Farbfächer. Für optimale Deckkraft sind Versiegelung und Beschichtung Ton in Ton zu wählen (vgl. Tabelle rechts).

NOTES:

Colours, gloss-grade and surface-structure are only approximate. The indications of colour shades of the colour standards, e.g. according to RAL or NCS, are approximate. Deviations from the reference colour are possible depending on the binder and degree of gloss of the surface. Therefore, a colour match against colour charts and colour fans cannot be guaranteed on patterns and on the object. Please be aware that the colours on digital display or print may differ from the actual colours. For colour specification please refer to an original RAL-/NCS-colour chart. Top-finish and self-levelling should be chosen in similar colours for optimal opacity (see table on the right).

* INFO

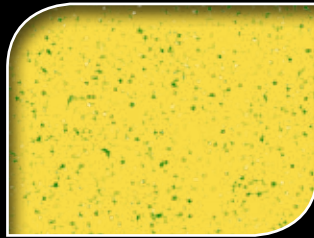

DE * Die Untergrundfarbe der Verlaufsbeschichtung sollte möglichst genau an die Farbe der Versiegelung angepasst werden. Die Versiegelung muss mindestens zweimal aufgebracht werden, um ein ausreichendes Deckvermögen zu garantieren. Bitte wenden Sie sich an unseren technischen Service unter info@porplastic.de

EN * The colour for the self-levelling has to match the top-finish exactly and the top-finish has to be applied at least twice to ensure sufficient hiding power. Please contact our technical service at info@porplastic.de
