Darstellung der Holzfronten (Möbel „Collection“) in geschliffener Ausführung ohne Oberflächenbehandlung.

Oak Wood

In alten Religionen wie auch Mythen und Sagen galt die Eiche als heiliger Baum, oft wurde sie auch als „Lebensbaum“ bezeichnet. Das wertvolle Holz gerade gewachsener Stämme wird bevorzugt zu Furnieren verarbeitet. Die Furniere präsentieren sich variantenreich mit mehr oder weniger Merkmalen. Die Eiche besticht mit typischen Farbstellungen, einer einzigartigen Haptik und durch ihre rustikale Ausstrahlung.

In old religions, as well as in myths and legends, the oak was considered to be a holy tree and was often called the “tree of life”. The valuable wood of straight logs is preferably converted into veneers. The veneers are highly variable and present themselves with features to a greater or lesser extent. Oak captivates with its typical colouring, a unique feel and its rustic appearance.

Hard Wood

Ob im Wald oder während des Verarbeitungsprozesses - Laubholz (Hardwood) besticht durch Widerstandsfähigkeit, Ausdrucksstärke und individuellen Charakter. Unser Angebot entstammt ausschließlich zertifizierten Wäldern in den USA oder in Europa. Ökologie und Nachhaltigkeit bestimmen unser Handeln.

Whether in the forest or during the conversion process - hardwood captivates through its resistance, expressiveness and individual character. The timber we offer comes solely from certified forests in the USA or Europe. Ecology and sustainability determine our actions.

Soft Wood

Über die Hälfte der Waldgebiete in Europa besteht aus Nadelholz (Softwood). Nadelholz findet im konstruktiven Hausbau ebenso Verwendung wie im Möbelbau, ob massiv oder furniert. Das Holz ist einfach zu bearbeiten, wirkt warm in der Optik, ist hervorragend geeignet für die Einbringung von markanten Strukturen und überzeugt mit der entsprechenden Haptik.

More than half the forest areas in Europe are made up of softwood. Softwood is used in housing construction as well as in furniture making, whether as solid wood or as veneer. The wood is easy to work, has a warm look, is ideally suitable for introducing striking textures and has a convincing corresponding feel.

Sortierung | Classification

- Classic A Gestürzt oder Gelegt: bestens geeignet für repräsentative Frontflächen. Mit für Frontfurnier typischen Merkmalen des Holzes.
Book match or slip match: ideal for representative front faces. With the typical wood features of front face veneers.
- Charismo E Brettcharakter: die besonders elegante und schlichte Friessortierung mit feinen Anschnitten im Brettcharakter.
Mismatch: an especially elegant quarter selection with fine half crowns in a mismatch appearance.
- Charismo N Brettcharakter: Naturmix ist eine Mischung aus Fries und Fladerfurnieren, die gezielt markante Holzmerkmale in den Fokus stellt.
Mismatch: Nature mix is a combination of quarters and crown veneers, including flake and other specific features of wood.
- Charismo S Brettcharakter: die Sortierung „Struktur“ bietet Flader- und Halbfladerfurniere in Brettcharakter.
Mismatch: created from numerous crown-cut patterns in small sequences, interspersed with half crowns.
